● Best Traditional Home

sponsored by Haddonstone

Haddonstone is the UK's leading manufacturer of architectural cast stonework, garden ornaments and fireplaces. The company's standard collection features over 500 designs to enhance any home, from porticos and balustrading to window surrounds and quoins. An extensive range of garden ornaments, including planters, fountains, furniture and statuary can provide the finishing touch to any project. Haddonstone can also produce custom designs from original, eroded stonework, or to individual specifications. All designs are produced at Haddonstone's Northamptonshire manufactory. Visit the company's acclaimed show gardens in the village of East Haddon, near Northampton. www.haddonstone.com

● Best Contemporary Home

sponsored by I-D-Systems

I-D-Systems, the UK's number one in the supply and/or installation of aluminium and timber folding sliding doors, sliding doors, windows and conservatory systems. Providing complete confidence by guaranteeing you the very best in quality, energy efficiency, security and reliability. Maximise the enjoyment of your surroundings, sit back, relax and bring the outside inside. www.i-d-systems.co.uk

● Best Conversion

sponsored by Handy Heat

Handy Heat (Floor Heating Systems Ltd) is a family business specialising in the supply of a range of electric floor heating systems and mirror demisters, including various heating cables, cable mats and our unique carbon heating film ideal for timber and laminate floors. These systems can be used as background heating or full heating systems, subject to room insulation. We have a full in-house design service that provides you with a total solution. Our main business is renovation, where low-floor height build-up is desired. We also supply systems for conservatories and property extensions, and have undertaken several larger projects. Please contact us on 0800 881 8097 for a free underfloor heating information pack. www.handyheat.co.uk

● Award for Residential Design

sponsored by Monodraught

Monodraught SunPipes pipe in natural light to any dark corner of your home through mirror-finish aluminium pipes with a diamond dome on the roof to capture all available light. There is virtually no limit to the length of the SunPipe and it can twist and turn to take the light to exactly where it is needed. SunPipes, or solar pipes as they are often called, have made a tremendous impact to the renovation of houses, since they are ideal for lighting up hallways, staircases, internal bathrooms and shower rooms. SunPipes are also complemented by the Sola-vent, which brings in natural light, but also has the solar-powered extract vent, together with two 50W downlights. www.monodraught.com

● Best Interior Scheme

sponsored by Poggenpohl

Poggenpohl is a world-renowned German manufacturer of luxury contemporary kitchens with a network throughout the UK. A kitchen from Poggenpohl is the centrepiece of any home. Flowing transitions between cooking and living areas integrate the social and practical elements of entertaining, without separating design from function. For more information, please call 0800 298 1098 or visit www.poggenpohl.co.uk. Poggenpohl kitchens retail from £20,000.

● Best Extension

sponsored by Calor

If you're taking on a self-build project you will need to consider how to fuel your new home. For self-builds off the mains gas network, Calor LPG (liquefied petroleum gas) offers all the same benefits as mains gas for cooking and heating. It is the most eco-friendly of the fossil fuels available to rural homeowners, producing 13.2% less greenhouse-gas emissions than an equivalent oil heating system. It is also compatible with renewable solutions, working as a back-up with energy sources, such as solar, to reduce your carbon footprint and cut your bills. For further information call Calor on 0800 626 626 or visit www.calor.co.uk

● Best Renovation

sponsored by pickupaproperty.com

pickupaproperty.com is a time-saving property search website dedicated solely to sourcing properties needing renovation in the UK. The site scans the internet for the latest development opportunities, from cosmetic makeovers to derelict buildings, and sends daily email alerts to its subscribers. Recommended by Sarah Beeny, it has been operating since 2004 and has many testimonials from satisfied clients. Subscribers receive alerts covering three or more counties, with links direct to the relevant agent/seller. With over 20,000 current properties on the fully searchable database there is plenty of choice. Check out pickupaproperty.com today for your FREE sample!

Call 01432 353353 or email enquiries@oakwrights.co.uk

● Best Eco Home

sponsored by Ice Energy

Ice Energy is the leading ground-source heat pump company with more installations and sales than any other UK firm. Ice Energy will design, supply and commission a project and has over 1,500 installations already completed. Ground-source heating uses renewable solar energy stored in the garden to run central heating and hot water systems, replacing diminishing traditional fossil fuel boilers such as oil and gas. The result is an efficient home which is continuously warm and cosy, whilst reducing carbon emissions. Call 0808 145 2340 or email mailroom@iceenergy.co.uk

● Best Small Home

sponsored by Singlepoint Networks

Singlepoint Networks is one of the leading suppliers of cabling systems for distribution of media throughout the home; including TV, broadband and telephones. Using the latest cable technologies, the Singlepoint system can provide TV, broadband and telephone simultaneously through one compact single-gang socket. Just about every media device can be connected, and attaching new ones or moving the furniture around becomes easy without having to worry about altering the TV socket and all the other wall points as well. Prices start from £1,495 + VAT. www.singlepointnetworks.co.uk

● Best DIY Project

sponsored by Villavent

Villavent Ltd is the premier supplier of low-energy whole-house heat-recovery ventilation systems in the UK today. Villavent soon recognised in the early 80s the requirement for a turnkey service to the homeowner and building industry and set about creating a national service of design, supply of all necessary materials, local installer network and commissioning service. This has enabled the DIY industry to install with confidence and, as such, has led to a booming national web kit to suit different sizes of property. Recent advances in levels of filtration and low running costs coupled with high-efficiency heat exchangers ensure that Villavent will be installed in many a home of the future. www.villavent.co.uk
